

SINGLE-CELL OMICS TISSUE DISAGGREGATION WEBINAR

hosted by the Flow Cytometry Core Facility

Overcoming the challenges of tissue dissociation for single-cell omics with the VIA Extractor™ tissue disaggregator

WHEN & WHERE?

SPEAKER

Angeliki Achimastou, Product Manager for Single-Cell, Genomics and Diagnostics Solutions, Cytiva

LEARNING OBJECTIVES

- Discover how tissue processing impacts cell viability and downstream results
- Learn how VIA Extractor™ tissue disaggregator generates suspensions of high-quality single cells

KEY FACTS VIA EXTRACTOR™

- Gentle: Optimized cell viability and yield from low impact disaggregation
- Standardized: Consistent process, output and yield reduce sample-to-sample variation.
- Fast, simple, and semi-automated process

If you are interested in testing the VIA Extractor™ for your projects, please reach out to Andreas Dolf after the webinar. We will have a demo slot beginning of 2023.
